

Freelancers Needed To Take Photos by Phone

Freelancers Needed To Take Photos by Phone

**Do you have a phone with a camera?
Take 3 photos and earn €4!
It doesn't matter where you live.**

Task

Find 10 people, and take 3 portrait photos of each person.

You earn €4 for each person. So you earn a total of €40 for 10 people.

We ask you to repeat this 3 times, for the same people.

Upon finishing all 3 rounds, your payment adds up to €120!

10 people is the minimum. The more people you include, the more payment you receive.

What's the catch?!

We want to be diverse in terms of race and gender. So you should take photos of only none white Caucasians (as we have enough of those in the existing data). Furthermore, you should stay in touch with the participants to be able to take their photos 3 times.

Legal stuff?

We prepared consent forms that we ask you and the participants to sign. Furthermore, we will have a training session for you and will explain all the legal and ethical stuff.

Why should I care?

An AI system such as a facial recognition technology could be racist. One reason is that these systems are built mainly based on white people's faces. With your help, we can fix this problem by creating a diverse and inclusive facial image database.

Interested?

Send an email to info.faces@tuebingen.mpg.de and please indicate your name and country of residence and we will get back to you.
