Agents needed to take photos by phone

Do you have a phone with a camera?
Take 3 photos and earn 4 euros!
It doesn't matter where you live.

Task:

You take 3 portrait photos of 10 people.
You earn €4 for each person. So you earn a total of €40 for 10 people.
We ask you to repeat this 3 times, for the same people.
Upon finishing all 3 rounds, your payment adds up to €120!

10 people is the minimum. The more people you include, your payment will increase accordingly.

What's the catch?!

We want to be diverse in terms of race and gender, so we ask you not to target white caucasians. Furthermore, you should stay in touch with the participants to be able to take their photos 3 times.

Legal stuff?

We prepared consent forms that we ask you and the participants to sign. Furthermore, we will have a training session for you and will explain all the legal and ethical stuff.

Why should I care?

We are a group of scientists who are trying hard to make artificial intelligence technologies more fair and inclusive. Your contribution would help us collect a diverse and inclusive training data for facial recognition technologies.

Interested?

Send an email to *info.diverseimagedataset@tuebingen.mpg.de* and mention your name and country of residence and we will get back to you.

Notes:

Include the Max Planck Institute for Intelligent Systems Logo.
Should we put Samira's title and webpage?
Somewhere should we put our website info?
